PROFILE

I am a multi-cultural graduate student in MFA Sculpture, Media and Context, with a high level of creative thinking and hands-on skills. With my extensive expertise in fine arts, I can positively influence the international cultural immersion of your agency. Because of my scientific background in human nutrition and metabolism, I pay attention to details and am efficient, fast learner and skilled in analysing metabolomic data. Additionally, my BSc thesis was in bioinformatics where I analysed clusters of meta data research about Diabetes type 1 and 2; and mapped the genes associated with those diseases. My future aspirations are to continue learning within a business research environment; where I can further develop my IT, administration of data and analytic capabilities. In short, I have a diverse background and wide range of interests that I believe fit your agency, and would enjoy to be the newest addition to your team.

EDUCATION

Master of Fine Arts, *The Royal Danish Academy of Fine Arts, School of Visual Arts*, Cph, DK Oct 2018-Present

WORK EXPERIENCE

Full-stack developer trainee, *HackYourFuture* - Copenhagen, DK Jun 2020-Present

- Working within a professional business team as a full-stack web developer trainee.
- In my team of 4 people we work on adding new features to the project such as notifications, drop- down menus, and some graphic elements to extend and improve on the whole project.
- Graduation project is currently being developed based on React framework, Javascript, MySQL to store the data, Swagger and Node.js. It will be a communication app between companies and employees.
- HackYourFuture is a free coding school for groups of people with limited access to the Danish labour market. Six months after graduation over 70% of students are in the job market as web developers

Customer service, *Docken*, Cph, DK Dec 2018-Dec 2019

- Focus on teamwork, making sure flow of service is running smoothly.
- Dynamic work environment where I learned to be patient when solving problems.
- Handling many different tasks per shift, advancing skills of responsibility and efficacy.

VOLUNTEERING EXPERIENCE

Founder and Managing Director , *Foraging and Wilderness Committee*, Bikuben, Cph

Sep 2020-Present

- Committee led and organised by international students of Bikuben Kollegiet with the purpose of integrating international students on the organisational administrative level.
- With the purpose of meeting the local ecosystem of Amager Fælled, we organise foraging tours where we learn how to identify and sustainably harvest local edible herbs, mushrooms, roots, berries, etc.

Artist and Gallery Director Assistance, *Alter Space Gallery*, San Francisco, CA

Aug 2015-Aug 2017

- Oversight, care and administration of the gallery's flow of business with focus on the exhibition program.
- Creative and crafty innovation of artworks for artist in residence.
- Acquainting and learning new skills in the art market.
- Assistance with in-house projects.
